DETAILED ACTION

1. The amendment filed February 26, 2004 has been received and entered.

Claim Objections

2. Claims 20-24 are objected to because of the following informalities. Appropriate correction is required.

Regarding claim 20, the claim is objected to because "said said" recited in lines 5-6.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 20-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 is vague and indefinite because "a paint feed tube for providing paint to a paint atomizer, comprising a first annular wall...for providing pressurized air to the paint atomizer" is not clearly described in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3752

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 13-24 and 29-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Saito (U.S. Patent No. 5,820,036).

Saito teaches an atomizer for coating comprising a bell defining a channel for delivering powder paint to the workpieces being coated (4), a tube fluidly connected between a source of powder paint and the channel thereby providing powder paint to the channel (A) i.e. a distal end (defined between an external part, E and an internal part, D) (see Fig. 1) and a hollow shaft concentrically aligned with the tube defining an air channel therebetween (B), wherein the air channel (i.e. concentrically aligned within the hollow shaft) is fluidly connected between a source of pressurized air and the paint channel (A) define by the bell thereby providing pressurized air to the channel. The external part of the paint channel defines an outer conical surface. The apparatus includes a hub (18) (disposes between the first annular wall, 17 and a second annular wall, 17a) disposed between the hollow shaft and the bell and defining an annular opening for channeling air from the air channel to the paint channel and a guidance air ring (26) directing pressurized air toward the conical surface of the external part. The hub defines an annular opening (26) having a volume less than a volume defined by the air channel; thereby increasing the pressure of air provided to the paint channel. Saito also teaches a first annular wall (17) defining a paint pipe and a second annular wall (17a) defining an air channel. The annular opening (26) defines a different volume (second volume) than a volume defined by the air channel (first volume) (B), thereby

adjusting the pressure of the pressurized air provided to the paint channel through the air channel.

Response to Arguments

5. Applicant's arguments filed February 26, 2004 have been fully considered but they are not persuasive. Applicant's arguments have been addressed in the above paragraphs.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
